

Mathematical Foundations for Finance

Exercise 13

Martin Stefanik
ETH Zurich

Tips for the Exam

- Make sure to at least go over all exercise sheets and their model solutions.
- Sample exams can be found on the course homepage.
- The structure of the exam will be the same as in the old exams of prof. Schweizer.
- Make sure that you do not prepare just by going through the exercise sheets and old exams.
- As usually, you can freely use the results shown in the lecture presented through exercise sheets. Knowing all the results is therefore naturally an advantage and saves time.

Thank you for your attention!
